

# DR. MED Face Filler CROSS-LINKED HYALURONIC ACID FILLERS

## Performance, Reliability, Durability

Dr. MED Fcae Filler is a full range of monophasic injectable dermal fillers based on hyaluronic acid with innovatory cross-linking technology to reduce the visual effects of ageing.

Dr. Med Face Filler is an ideal solution for most common procedures of wrinkle elimination and correction of aesthetic defects. The line includes 6 types of fillers suitable for various aesthetic medicine procedures.

*\*The results can last for 9–18 months, depending on the type of filler, nature of the procedure and the patient's physical characteristics.*

### Filling and smoothing of wrinkles on the face, neck, and hands

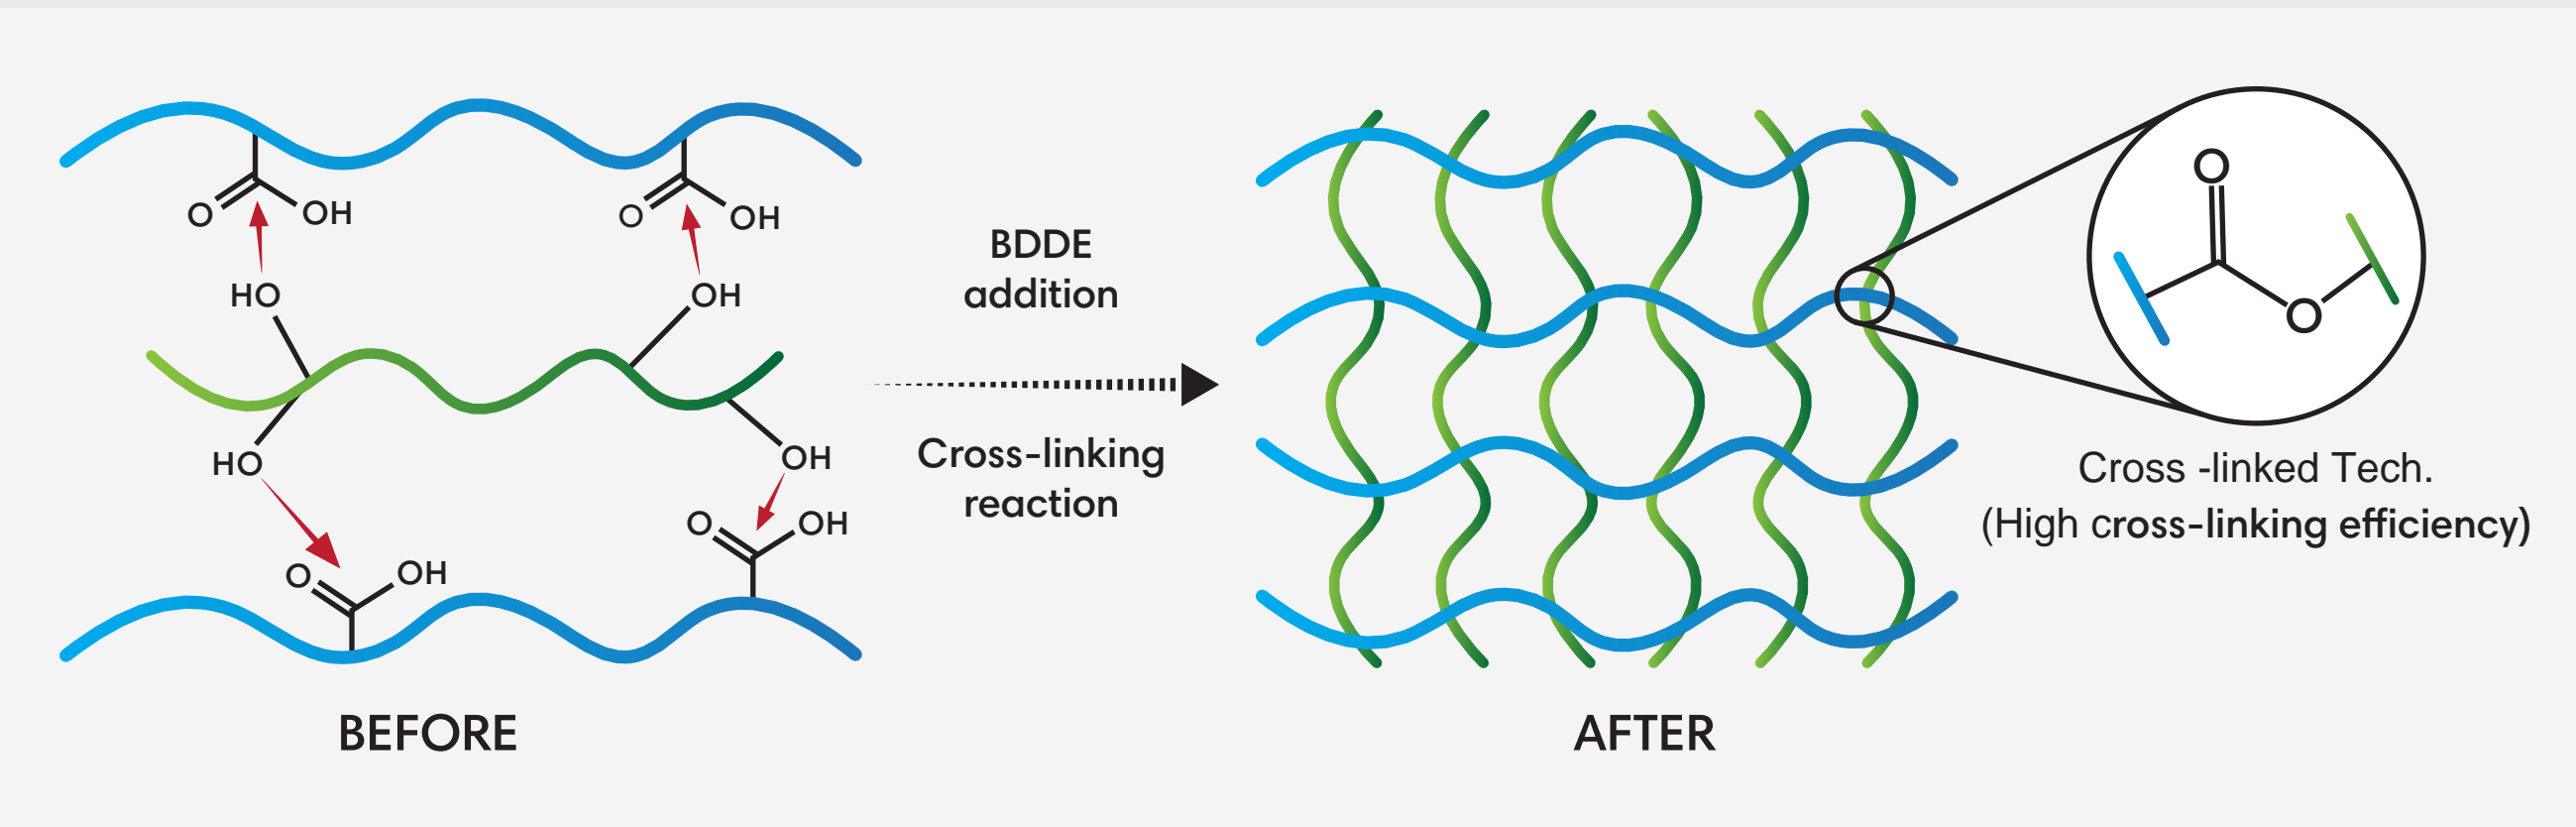

- ● Correction of fine lines and superficial wrinkles
- ● Correction of medium to deep folds
- ● ● Smoothing of wrinkled and creased areas

### Facial volume restoration and creation

- Increasing volume of cheekbones and cheeks
- Restoration of volume of soft tissue in temporal and malar zones
- ● Face contour correction
- Chin, jawline, nose shape correction

## Cross-Linked Tech.

Cross-Linked Tech allows our fillers to have a constant and soft injection force while maintaining a consistent particle shape and stable viscoelasticity.

The technology minimises the side effects of the treatment by increasing the ease of the procedure.
